

CTAV Shirt Carrier System (SCS)TM

Body Armor Base Layer

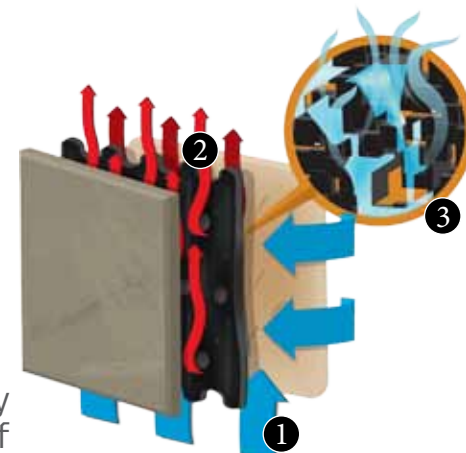

Includes front and back CTAV panels and one (1) shirt carrier

SCSTM

A moisture-wicking, breathable base layer combined with the CTAV to deliver passive microclimate cooling to military, law enforcement and corrections personnel. The SCSTM keeps you cooler, drier and more comfortable in your concealable and tactical armor.

How It Works

- 1 Outside air flows between armor and torso
- 2 Body heat naturally vents from behind armor and is no longer trapped
- 3 Nanocrystal surface technology accelerates the evaporation of sweat

Colors: Black, White,
*Border Patrol Green
Sizes: S - XXL
100% Polyester

**CTAV is on the U.S. CBP Authorized Equipment List*
